JCM to Supply Ticket2Go Solution to 150 Talarus Sites

DÜSSELDORF, Germany (6 February 2017) – [JCM Global](#) has signed a contract to supply its leading [Ticket2Go®](#) solution to more than 150 Talarus sites in the U.K. Talarus, which was recently acquired by Novomatic, is one of the largest AGC operators in the U.K. and JCM's Ticket2Go will offer a safe, secure and easy to use after-market ticketing solution.

JCM's Ticket2Go is a retrofit ticketing solution for gaming and AWP devices that do not support standard ticketing protocols. Ticket2Go is designed and developed for small to medium-sized gaming venues, and it can be installed across multiple sites, enabling operators to replace coin payout technology with a simple ticket-based solution.

"We are excited to deploy our Ticket2Go solution to Talarus sites. TITO provides a streamlined collection process which totally eradicates the need to float and dump hoppers, vastly improving the on floor collection times, it also reduces service costs and machine down time by reducing the coin handling issues associated with Gaming machines," JCM EMEA General Manager [Payam Zadeh](#) said. "Additionally, Ticket2Go has been proven to increase cash box intake by more than 10 percent, while also providing increased player convenience and satisfaction. Furthermore, operators typically experience savings due to reduced collection times, no filling of coin hoppers and less handling of cash."

Ticket2Go is designed for machines installed with ccTalk & parallel coin mechs and bill validators, and there is a side box option for some markets with or without ticket scanners. Ticket2Go operates across a standard Ethernet network used to connect the machine with the Site Terminal.
