

## JCM completes FutureLogic acquisition

**JCM Global has finalised its acquisition of FutureLogic, further enhancing its position as a leading supplier of peripheral products.**

JCM's line of component products now includes bill validators, printers, digital media as well as FutureLogic printers and couponing solutions, such as Ticket2Go, TableXchange and PromoNet systems products.

In addition to the FutureLogic line of products, JCM will continue to market, sell, service and

support the Nanoptix line of printers, including the award-winning PayCheck 4 thermal printer.

JCM Global's vice president of sales, Mark Henderson, said: "This is an exciting day for JCM. With this acquisition finalised, we are able to expand our portfolio to further increase our level of customer service. Now we are better equipped than ever to provide industry-leading solutions to our customers in the diverse industries we serve around the world."

## Sphinx 3D now live in Europe

**GTECH's award-winning Sphinx 3D game is now live on casino floors throughout Europe.**

The game made its European debut throughout Germany with installations at all nine of the Spielbanken Bayern properties in Bavaria. Casinos in Italy, Spain, Cyprus, Estonia, Latvia and Slovenia have also implemented the game, with more European countries to soon follow. The US also went live with Sphinx 3D installations across various states including Nevada.

"The preliminary feedback we have received from players at promotional events where Sphinx 3D is live has been extremely positive," said GTECH's international vice president of commercial gaming, Marcel Heutmekers. "Players are enjoying the 3D effects as they enhance the typical gaming experience and add an extra level of excitement. We are looking forward to installing these machines in more casinos around the world in the months to come."

The Sphinx 3D game is the first of its kind to use a glasses-free 3D display and the first game released as part of GTECH's True 3D line. It pairs autostereoscopic technology with eye-tracking that constantly adjusts the image based on the player's line of sight. This generates a high-resolution image that leaps off the screen, creating an experience unlike any other game on the market.

The game runs on the AXXIS

cabinet, which creates a sense of personal space and maximises player comfort. The cabinet, combined with the True 3D technology, produces an all-encompassing 3D experience.

"We're very pleased about the launch of the Sphinx 3D game in each of our nine casinos," said Staatliche Lotterieverwaltung Bayern vice president Josef Müller. "The product looks great and customers immediately take to the machine's unique features and functionality.

Players are very impressed when they see the 3D effects for the first time and their reaction shows that we made the right decision by adding the game to our casinos."

The latest European installations include Casino di Sanremo in Italy, which is the first Italian venue to offer the game, and the two HIT

Casino Perla and Park in Nova Gorica, Slovenia. The Sphinx 3D has won three industry awards.

Tom Chan

## New face at GLI Asia

**GAMING Laboratories International is again expanding its staff in Australasia.**

The company has named advanced technology sales and marketing expert Tom Chan as business development manager in the Macau laboratory, GLI Asia. Chan is a permanent resident of Macau and Hong Kong.

He comes to GLI with extensive technological experience and is fluent in English, Chinese and Putonghua.

"We are thrilled to welcome Tom to the GLI team," said GLI Australia chief operating officer Espee de Robillard. "We continue to grow extensively throughout the Australasia region and as technology continues to advance and become more complex, our staff and our clients will be well served by having a development representative as knowledgeable as Tom."

## JCM and GPT in South Africa deal

**JCM Global has entered into a distribution agreement with Global Payment Technologies in South Africa.**

Under the arrangement, GPT will sell and service JCM's entire line of bill validation products in South Africa. The agreement brings JCM products back to South Africa, including the award-winning iVIZION, transactional bill validator and the company's new DBV series.

JCM's EMEA general manager, Payam Zadeh, said: "Our award-winning product line of bill validators and other peripheral equipment has set global standards. We are very pleased to announce this arrangement with GPT to bring JCM solutions to the operators in South Africa who have been asking for our products."

Wanda van Vuuren, national sales and marketing director at GPT, said: "JCM Global and its line of products are internationally known for high quality design and world-class service. We are proud to partner with JCM to bring their solutions to South Africa."
